

Hose reel for initial interference

- Hose reel to be used to initiate the fire extinguishing
- Reinforced hose to withstand the high pressure of the pump
- High quality swivels
- Multi-purpose nozzle attached to the end of the hose
- All the connections can withstand high pressure
- Galvanized steel side fittings for fixing
- Hose length from 30-60 m
- Hose diameter between ¾ “ to 1”
- The hose reel is fitted on revolving seats for easy coiling of the reel
- The reel can be equipped with electrical controls for coiling the reel (optional for extra cost)

Uses:

- With the fire fighting truck
- To be installed at the rear of the truck in case of a rear ship pump or in the middle in case of a midship pump
- With civil defense networks (on the walls) to be stored inside cabinets installed on the walls or on trailers
- The hose reels are designed and manufactured according to the specifications of the civil defense authorities
