

- Locks the wheel completely and holds the car in position.
- Car will not move forward or backward.
- It will not damage car wheels or components.
- This is used by police for cars parking in unauthorized locations.
- Keep the car from being stolen.
- The unit is heavy duty.
- Proven reliability in tough Egyptian police conditions.
- Made of steel.
- Light weight.
- The unit could be fitted with the logo of the user.
- Useful for tires 12" to 22".
- Locks are from American locks company.
- Keys could be similar or different for every one.
- Master key could be delivered.
- 2 layers of paint after primary layer, of course sand blasting will be done in the first place.

The unit comprises of 3 parts:

1. **Jaw:** Holds the sides and front of the wheel.
2. **Arm:** Covers the nuts of the wheel to prevent any one from trying to replace the wheel.
3. **Lock:** Holds the arm and jaw together so only authorized key holders would be able to take off the unit.
